Triggers	De-escalator - tips
A sudden change in routine	If possible, let A.student know in plenty of time if changing classroom etc. A.Student will sometimes need timeout with his support assistant to process changes to routine (e.g. supply teacher)
Loud classroom environment	If A.Student starts to show signs of distress (fidgeting, tapping the desk) allow him time out of the classroom as a sensory break.
Group work	Allow A.Student to choose the group he would feel most comfortable working in. Ensure that A.Student is assigned a role within the group and understand how to participate effectively.
